

## NOTICE-CUM-ADDENDUM

**Notice-cum-Addendum to the Scheme Information Document (SID)/Key Information Memorandum (KIM) of ICICI Prudential Dividend Yield Equity Fund (referred as 'the Scheme')**

NOTICE IS HEREBY GIVEN THAT ICICI Prudential Trust Limited (the Trustee), has approved change in fundamental attributes of the Scheme with effect from closure of business hours on December 26, 2019 ("Effective Date").

Securities and Exchange Board of India has communicated its no-objection for the above changes vide its letter no. IMD/DF3/OW/P/2019/22227/1 dated August 28, 2019.

The existing and revised provisions of the Scheme are mentioned below:

Feature of the Scheme	Existing Provision	Proposed Provisions																											
<b>Name of the Scheme</b>	ICICI Prudential Dividend Yield Equity Fund	No Change																											
<b>Type of Scheme</b>	An open ended equity scheme predominantly investing in dividend yielding stocks	No Change																											
<b>Investment Objective</b>	The investment objective of ICICI Prudential Dividend Yield Equity Fund is to provide medium to long term capital gains and/or dividend distribution by predominantly investing in a well-diversified portfolio of equity and equity related instruments of dividend yielding companies.  However, there can be no assurance or guarantee that the investment objective of the Scheme would be achieved.	No Change																											
<b>Asset Allocation Pattern</b>	Under normal circumstances, the asset allocation under the Scheme will be as follows: <table border="1"> <thead> <tr> <th>Instruments</th> <th>Indicative allocations (% of total assets)</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Equity &amp; Equity related securities of dividend yielding companies</td> <td>65 - 100</td> <td>Medium to High</td> </tr> <tr> <td>Equity &amp; Equity related securities of other than dividend yielding companies</td> <td>0 - 35</td> <td>Medium to High</td> </tr> <tr> <td>Debt &amp; Money market instruments</td> <td>0 - 35</td> <td>Low to Medium</td> </tr> </tbody> </table> <p>The Scheme may also take exposure to:</p> <ul style="list-style-type: none"> <li>Derivatives instruments up to 100% of the Net Assets.</li> <li>ADR/GDR/Foreign securities/Overseas ETFs up to 50% of the Net Assets. Investments in ADR/GDR and foreign securities would be as per SEBI Circular dated September 26, 2007 as may be amended from time to time.</li> <li>Securitized Debt up to 50% of the Net Assets or maximum permissible limit for debt portfolio, whichever is lower.</li> <li>Stock lending up to 20% of its net assets.</li> </ul> <p>The Scheme will not deal in repo in corporate bonds.</p> <p>In the event of variance in the asset allocation, the fund manager will carry out portfolio rebalancing within 30 Days. Further, in case the portfolio is not rebalanced within the period of 30 days, justification for the same shall be placed before the investment committee and reasons for the same shall be recorded in writing. The investment committee shall then decide on the course of action. Though every endeavor will be made to achieve the objectives of the Scheme, the AMC/Sponsors/Trustees do not guarantee that the investment objectives of the Scheme will be achieved.</p> <p>The Cumulative Gross Exposure to Equity, Debt and Derivatives Positions will not exceed 100% of the Net Assets of the Scheme.</p>	Instruments	Indicative allocations (% of total assets)	Risk Profile	Equity & Equity related securities of dividend yielding companies	65 - 100	Medium to High	Equity & Equity related securities of other than dividend yielding companies	0 - 35	Medium to High	Debt & Money market instruments	0 - 35	Low to Medium	Under normal circumstances, the asset allocation under the Scheme will be as follows: <table border="1"> <thead> <tr> <th>Instruments</th> <th>Indicative allocation (% of corpus)</th> <th>Risk Profile</th> </tr> </thead> <tbody> <tr> <td>Equity &amp; Equity related securities of dividend yielding companies</td> <td>65 - 100</td> <td>Medium to High</td> </tr> <tr> <td>Other Equity &amp; Equity related securities</td> <td>0 - 35</td> <td>Medium to High</td> </tr> <tr> <td>Debt &amp; Money market instruments</td> <td>0 - 35</td> <td>Low to Medium</td> </tr> <tr> <td>Units issued by REITS and INVITs, or any other asset as may be permitted by SEBI from time to time.</td> <td>0 - 10</td> <td>Medium to High</td> </tr> </tbody> </table> <p>The Scheme may also take exposure to:</p> <ul style="list-style-type: none"> <li>Derivatives instruments up to 80% of the Net Assets.</li> <li>ADR/GDR/Foreign securities/Overseas ETFs up to 50% of the Net Assets. Investments in ADR/GDR and foreign securities would be as per SEBI Circular dated September 26, 2007 as may be amended from time to time.</li> <li>Securitized Debt up to 50% of the Net Assets or maximum permissible limit for debt portfolio, whichever is lower.</li> <li>Stock lending up to 20% of its net assets.</li> </ul> <p>The Scheme may undertake repo transactions in corporate debt securities in accordance with the directions issued by RBI and SEBI from time to time. Such investment shall be made subject to the guidelines which may be prescribed.</p> <p>In the event of variance in the asset allocation, the fund manager will carry out portfolio rebalancing within 30 Days. Further, in case the portfolio is not rebalanced within the period of 30 days, justification for the same shall be placed before the investment committee and reasons for the same shall be recorded in writing. The investment committee shall then decide on the course of action. Though every endeavor will be made to achieve the objectives of the Scheme, the AMC/Sponsors/Trustees do not guarantee that the investment objectives of the Scheme will be achieved.</p> <p>The Cumulative Gross Exposure to Equity, Debt and Derivatives Positions, REITs and INVITs will not exceed 100% of the Net Assets of the Scheme.</p>	Instruments	Indicative allocation (% of corpus)	Risk Profile	Equity & Equity related securities of dividend yielding companies	65 - 100	Medium to High	Other Equity & Equity related securities	0 - 35	Medium to High	Debt & Money market instruments	0 - 35	Low to Medium	Units issued by REITS and INVITs, or any other asset as may be permitted by SEBI from time to time.	0 - 10	Medium to High
Instruments	Indicative allocations (% of total assets)	Risk Profile																											
Equity & Equity related securities of dividend yielding companies	65 - 100	Medium to High																											
Equity & Equity related securities of other than dividend yielding companies	0 - 35	Medium to High																											
Debt & Money market instruments	0 - 35	Low to Medium																											
Instruments	Indicative allocation (% of corpus)	Risk Profile																											
Equity & Equity related securities of dividend yielding companies	65 - 100	Medium to High																											
Other Equity & Equity related securities	0 - 35	Medium to High																											
Debt & Money market instruments	0 - 35	Low to Medium																											
Units issued by REITS and INVITs, or any other asset as may be permitted by SEBI from time to time.	0 - 10	Medium to High																											
<b>Investment Strategy</b>	The Scheme would invest predominantly in dividend yielding companies, as identified at the time of making the investment.  While the criterion of dividend-yield would be used to identify the investment universe from which the portfolio will be constructed, within this universe, there will be a strong focus on selecting companies on following parameters: <ol style="list-style-type: none"> <li>Business Fundamentals</li> <li>Quality of Management</li> <li>Industry Trends</li> <li>Growth Prospects</li> <li>Track Record and Consistency of Dividend Payments</li> <li>Volatility of the stock</li> </ol> <p>The overall portfolio structuring would aim at controlling risk at a moderate level.</p> <p>Stock picking on the basis of dividend yield aims to avail the triple benefits of dividend income, downside risk management and potential for capital appreciation. Investment in stocks with high dividend yields is traditionally a "Defensive Investment Strategy." High dividend yield stocks are more likely to provide greater degree of protection to investors than other stocks in falling equity market. On the other hand, these stocks show good possibilities of capital appreciation in reviving market.</p> <p>As high dividend payouts in general imply that there is enough cash generation by the business, it may also indicate that the stock is under-priced in spite of high cash generating ability. An investment in these stocks in bearish market could unlock significant value as and when the markets pick up.</p> <p>Thus, the investment strategy of the Scheme would focus on identifying and investing in a basket of dividend yield companies, which are expected to declare dividends on a consistent basis and also provide an opportunity for capital appreciation.</p> <p>The Scheme may also invest a part of its corpus in overseas markets in Global Depository Receipts (GDRs), American Depository Receipts (ADRs), overseas equity, bonds and mutual funds and such other instruments as may be allowed under the Regulations from time to time.</p> <p>The Scheme may engage in Stock Lending activities.</p> <p>The Scheme may invest in derivatives such as Futures &amp; Options and such other derivative instruments like Stock/Index Futures, Interest Rate Swaps, Forward Rate Agreements or such other derivative instruments as may be introduced and permitted by SEBI from time to time. The Scheme may invest in derivative for the purpose of hedging, portfolio balancing and other purposes as may be permitted under the Regulations. Hedging using Interest Rate Futures could be perfect or imperfect, subject to applicable regulations.</p> <p><b>Fixed Income securities</b></p> <p>The Scheme may also invest in Debt and Money Market Securities/Instruments (Money Market securities include cash and cash equivalents). The Scheme aims to identify securities which offer optimal level of yields/returns, considering risk-reward ratio. With the aim of controlling risks rigorous in depth credit evaluation of the securities proposed to be invested in will be carried out by the Risk Management Team of the AMC. The credit evaluation includes a study of the operating environment of the issuer, the short as well as long-term financial health of the issuer. Rated debt instruments in which the Scheme invests will be of investment grade as rated by a credit rating agency. The AMC may consider the ratings of such Rating Agencies as approved by SEBI to carry out the functioning of rating agencies. The Scheme may invest in securitised debt.</p> <p>In addition, the investment team of the AMC will study the macro economic conditions, including the political, economic environment and factors affecting liquidity and interest rates. The AMC would use this analysis to attempt to predict the</p>	The Scheme would invest predominantly in dividend yielding companies, as identified at the time of making the investment. Investors are requested to note that following provisions shall stand inserted in the Scheme Information Document and Key Information Memorandum of the Scheme, as applicable:

### 1. Scheme specific risk factors:

#### 1.1. Risk factors associated with Investments in REITs and INVITs:

##### Market Risk:

REITs and INVITs are volatile and prone to price fluctuations on a daily basis owing to market movements. Investors may note that AMC/Fund Manager's investment decisions may not always be profitable, as actual market movements may be at variance with the anticipated trends. The NAV of the Scheme is vulnerable to movements in the prices of securities invested by the scheme, due to various market related factors like changes in the general market conditions, factors and forces affecting capital market, level of interest rates, trading volumes, settlement periods and transfer procedures. The scheme will undertake active portfolio management as per the investment objective to reduce the market risk.

##### Liquidity Risk:

As the liquidity of the investments made by the Scheme(s) could, at times, be restricted by trading volumes and settlement periods, the time taken by the Mutual Fund for liquidating the investments in the scheme may be high in the event of immediate redemption requirement. Investment in such securities may lead to increase in the scheme portfolio risk. The fund will try to maintain a proper asset-liability match to ensure redemption payments are made on time and not affected by illiquidity of the underlying units.

##### Reinvestment Risk:

Investments in REITs & INVITs may carry reinvestment risk as there could be repatriation of funds by the Trusts in form of buyback of units or dividend pay-outs, etc. Consequently, the proceeds may get invested in assets providing lower returns. However, the reinvestment risk will be limited as the proceeds are expected to be a small portion of the portfolio value.

The above are some of the common risks associated with investments in REITs & INVITs. There can be no assurance that a Scheme's investment objectives will be achieved, or that there will be no loss of capital. Investment results may vary substantially on a monthly, quarterly or annual basis.

#### 1.2. Risk factors associated with writing covered call options for equity shares

- Writing call options are highly specialized activities and entail higher than ordinary investment risks. In such investment strategy, the profits from call option writing is capped at the option premium, however the downside depends upon the increase in value of the underlying equity shares.
- The Scheme may write covered call option only in case it has adequate number of underlying equity shares as per regulatory requirement. This would lead to setting aside a portion of investment in underlying equity shares. If covered call options are sold to the maximum extent allowed by regulatory authority, the scheme may not be able to sell the underlying equity shares immediately if the view changes to sell and exit the stock. The covered call options need to be unwound before the stock positions can be liquidated. This may lead to a loss of opportunity, or can cause exit issues if the strike price at which the call option contracts have been written become illiquid. Hence, the scheme may not be able to sell the underlying equity shares, which can lead to temporary illiquidity of the underlying equity shares and result in loss of opportunity.
- The writing of covered call option would lead to loss of opportunity due to appreciation in value of the underlying equity shares. Hence, when the appreciation in equity share price is more than the option premium received the scheme would be at a loss.
- The total gross exposure related to option premium paid and received must not exceed the regulatory limits of the net assets of the scheme. This may restrict the ability of Scheme to buy any options.

#### 1.3. Risk factors associated with repo transactions in Corporate Debt Securities

##### Lending transactions:

The scheme may be exposed to counter party risk in case of repo lending transactions in the event of the counterparty failing to honour the repurchase agreement. However in repo lending transactions, the collateral may be sold and a loss is realized only if the sale price is less than the repo amount. The risk may be further mitigated through over-collateralization (the value of the collateral being more than the repo amount). Further, the liquidation of underlying securities in case of counterparty default would depend on liquidity of the securities and market conditions at that time. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation and over-collateralization to cushion the impact of market risk on sale of underlying security.

##### Borrowing transactions:

In the event of the scheme being unable to pay back the money to the counterparty as contracted, the counter party may dispose of the assets (as they have sufficient margin). This risk is normally mitigated by better cash flow planning to take care of such repayments. Further, there is also a Credit Risk that the Counterparty may fail to return the security or Interest received on due date. It is endeavoured to mitigate the risk by following an appropriate counterparty selection process, which include their credit profile evaluation.

### 2. Investment Restrictions:

#### 2.1. Investment Restrictions for Investment in REITs/INVITs

A mutual fund may invest in the units of REITs and INVITs subject to the following:

- No mutual fund under all its schemes shall own more than 10% of units issued by a single issuer of REIT and INVIT; and
- A mutual fund scheme shall not invest:
  - more than 10% of its NAV in the units of REIT and INVIT; and
  - more than 5% of its NAV in the units of REIT and INVIT issued by a single issuer.

#### 2.2. Investment Restrictions for Covered Call strategy

Mutual Fund schemes (excluding ETFs and Index funds) can write Call options under a covered strategy for constituent stocks of NIFTY 50 and BSE SENSEX subject to the following:

- The total notional value (taking into account strike price as well as premium value) of call options written by a scheme shall not exceed 15% of the total market value of equity shares held in that scheme.
- The total number of shares underlying the call options written shall not exceed 30% of the unencumbered shares of a particular company held in the scheme. The unencumbered shares in a scheme shall mean shares that are not part of Securities Lending and Borrowing Mechanism (SLBM), margin or any other kind of encumbrances.
- At all points of time the Mutual Fund scheme shall comply with the provisions at points (a) and (b) above. In case of any passive breach of the requirement at paragraph (a) above, the respective scheme shall have 7 trading days to rebalance the portfolio. During the rebalancing period, no additional call options can be written in the said scheme.
- In case a Mutual Fund scheme needs to sell securities on which a call option is written under a covered call strategy, it must ensure compliance with paragraphs (a) and (b) above while selling the securities.
- In no case, a scheme shall write a call option without holding the underlying equity shares. A call option can be written only on shares which are not hedged using other derivative contracts.
- The premium received shall be within the requirements prescribed in terms of SEBI circular dated August 18, 2010 i.e. the total gross exposure related to option premium paid and received must not exceed 20% of the net assets of the scheme.
- The exposure on account of the call option written under the covered call strategy shall not be considered as exposure in terms of paragraph 3 of SEBI Circular no. Cir/IMD/DF/11/2010, dated August 18, 2010.
- The call option written shall be marked to market daily and the respective gains or losses factored into the daily NAV of the respective scheme(s) until the position is closed or expired.

#### 2.3. Investment restrictions for Repo transactions in Corporate Debt Securities:

Below stated conditions and norms shall apply to repo in corporate debt securities, which are subject to change as may be prescribed by SEBI and/or RBI from time to time:

- Any scheme shall not lend/borrow more than 10% of its net assets in repo against corporate debt securities.
- The cumulative gross exposure through repo transactions in corporate debt securities along with equity, debt, derivatives and any other permitted assets shall not exceed 100% of the net assets of the Scheme.
- The Scheme shall borrow through repo transactions only if the tenor of the transaction does not exceed a period of six months.
- The exposure limit/investment restrictions prescribed under the Seventh Schedule of the Regulations and circulars issued there under (wherever applicable) shall be applicable to repo transactions in corporate debt securities.

e) Counterparty selection & credit rating:

The AMC follows an issuer selection and approval process for fixed income investments and the same shall be used for selection of counterparties for repo in corporate debt securities. Repo transactions shall be carried out with only those counterparties who have a credit rating of 'AA- and above' (Long term rating) or 'A1+' (Short term rating) provided by any credit rating agency as accredited by SEBI from time to time.

f) Tenor of Repo:

Tenor of repo shall not exceed 6 months. There shall be no restriction/limitation on the tenor of collateral.

g) Applicable haircut:

The AMC would be guided by the parameters for applying haircut as may be specified by RBI and/or SEBI for undertaking repo in corporate debt securities, from time to time.

h) Rating of underlying instruments:

The schemes shall participate in repo transactions only in AA (or equivalent short term rating) and above rated corporate debt securities.

3. **Exposure to Derivatives:**

**Covered Call Option Strategy:** A call option gives the holder (buyer) the right but not the obligation to buy an asset by a certain date for a certain price. Covered calls are an options strategy where a person holds a long position in an asset and writes (sells) call options on that same asset to generate an income stream.

**Benefits of using Covered Call strategy in Mutual Funds:**

The covered call strategy can be followed by the Fund Manager in order to hedge risk thereby resulting in better risk adjusted returns of the Scheme. This strategy is also employed when the Fund Manager has a short-term neutral view on the asset and for this reason holds the asset long and simultaneously takes a short position via covered call option strategy to generate income from the option premium. The strategy offers the following benefits:

a) Hedge against market risk - Since the fund manager sells a call option on a stock already owned by the mutual fund scheme, the downside from fall in the stock price would be lower to the extent of the premium earned from the call option.

b) Generating additional returns in the form of option premium in a range bound market.

Thus, a covered call strategy involves gains for unit holders in case the strategy plays out in the right direction.

**Illustration – Covered Call strategy using stock call options:**

Suppose, a fund manager buys equity stock of ABC Ltd. For ₹ 1000 and simultaneously sells a call option on the same stock at a strike price of ₹ 1100. The scheme earns a premium of say, ₹ 50. Here, the fund manager does not think that the stock price will exceed ₹ 1100.

**Scenario 1: Stock price exceeds ₹1100**

The call option will get exercised and the fund manager will sell the stock to settle his obligation on the call at ₹ 1100 (earning a return of 10% on the stock purchase price). Also, the scheme has earned a premium of ₹ 50 which reduced the purchase cost of the stock (₹ 1000 – ₹ 50 = ₹ 950).

Net Gain – ₹ 150

**Scenario 2: Stock prices stay below ₹ 1100**

The call option will not get exercised and will expire worthless. The premium earned on call option will generate alpha for the scheme.

Net Gain – ₹ 50.

**Provisions related to Change in Fundamental Attributes**

In accordance with Regulation 18(15A) of the SEBI (Mutual Funds) Regulations, 1996 the existing unitholders (i.e. whose names appear in the register of unitholders as on close of business hours on November 18, 2019) under the Scheme are hereby given an option to exit, i.e. either redeem their investments or switch their investments to any other schemes of ICICI Prudential Mutual Fund, exit period starting from November 25, 2019 till December 26, 2019 (both days inclusive and up to 3.00 pm on December 26, 2019) at Applicable NAV, without payment of any exit load. The Exit Option can be exercised during the Exit Option Period by submitting a valid redemption / switch request at any Official Point of Acceptance of the Fund. For list of Official Points of Acceptance, please visit our website. A separate written communication is being sent to the existing Unit holders in this regard. In case any existing Unit holder has not received an Exit Option Letter, they are advised to contact any of our Investor Service Centres. Unitholders who do not exercise the exit option by 3.00 pm on December 26, 2019 would be deemed to have consented to the proposed modification. It may also be noted that no action is required in case Unitholders are in agreement with the aforesaid changes, which shall be deemed as consent being given by them for the proposed changes. Kindly note that an offer to exit is merely optional and is not compulsory.

All the valid applications for redemptions/switch received under the Scheme shall be processed at Applicable NAV of the day of receipt of such redemption/switch request, without payment of any exit load, provided the same is received during the exit period mentioned above. Unitholders who have pledged or encumbered their units will not have the option to exit unless they procure a release of their pledges/encumbrances prior to the submission of redemption/switch requests. Unitholders should ensure that their change in address or bank details are updated in records of ICICI Prudential Mutual Fund as required by them, prior to exercising the exit option for redemption of units. Unit holders holding Units in dematerialized form may approach their Depository Participant for such changes. In case units have been frozen/locked pursuant to an order of a government authority or a court, such exit option can be executed only after the freeze/lock order is vacated/revoked within the period specified above. The redemption proceeds shall be dispatched within 10 (ten) business days of receipt of valid redemption request to those unitholders who choose to exercise their exit option. Redemption/switch of units from the scheme, during the exit period, may entail capital gain/loss in the hands of the unitholder. Similarly, in case of NRI investors, TDS shall be deducted in accordance with the applicable Tax laws, upon exercise of exit option and the same would be required to be borne by such investor only. In view of individual nature of tax implications, unitholders are advised to consult their tax advisors.

The updated SID & KIM of the scheme containing the revised provisions shall be made available with our Investor Service Centres and also displayed on the website immediately after completion of duration of exit option.

We hope that you will provide us your support; in case of any queries you can reach our call centre on 18002006666/1800222999. We assure you that these changes are in line with our best endeavors to serve you better.

**All other features and terms and conditions of the Scheme shall remain unchanged.**

**This Notice-cum-Addendum forms an integral part of the SID/KIM issued for the Scheme, read with the addenda issued from time to time.**
