## Ab market ke utar-chadhav ka darr kaisa?

**ICICI Prudential Balanced Advantage Fund**, is an open ended dynamic asset allocation fund that aims to generate reasonable returns in various market scenarios.

### Asset Allocation:

| Type of Security   | Maximum | Minimum | Risk Profile |
|--|---------|---------|--------------|
| Equity and equity derivatives (equity hedged exposure)#            | 100%    | 65%     | Medium-High  |
| Debt securities (securitised debt up to 50% of the debt portfolio) | 35%     | 0%      | Low-Medium   |

# The unhedged equity exposure of the scheme shall be limited to 80% of the portfolio value (unhedged equity exposure means exposure to equity shares alone without a corresponding exposure to equity derivatives. The margin money requirement for the purpose of derivative exposure will be held in the form of term deposits).

### Investment philosophy:

**Equity:** The scheme will invest predominantly in equities and use derivatives to hedge the downside risk of the portfolio.

- **Blend of large and mid-cap stocks:** While the large cap stocks represent established enterprises, the midcaps are smaller business entities with long-term growth potential. The allocation is decided on a tactical basis rather than any predefined ratio.
- **Derivatives strategy:** The scheme will use derivative instruments for the purpose of hedging or portfolio rebalancing or for any other stock and/or index strategies as allowed under the SEBI regulations.
- **Asset allocation:** The scheme uses an in-house model, based on a long-term historical mean price to book value (P/BV), with a view to limit downside during a falling market, while aiming to capture the upside in a rising market.

**Debt:** The Scheme also invests a portion of its assets in fixed income securities issued by the government, public sector undertakings, and private companies with an aim to generate accrual income and potential capital appreciation.

- The allocation to debt securities is also dependent on the in-house Price to Book Value model.

Note: The portfolio, asset allocation and investment strategy of the scheme is subject to changes with in the provisions of the Scheme Information document of the scheme. Please refer to the SID for investment pattern, strategy and risk factors.

## Points to Remember

- The scheme aims to provide an opportunity for reasonable returns with relatively lower volatility.
- The scheme seeks to provide investors an opportunity to benefit out of market volatility.
- The Scheme uses an in-house valuation model seeking to limit the downside risk during a falling market and aiming to capture growth opportunities in a rising market.

## Suitability

- Investors can consider **ICICI Prudential Balanced Advantage Fund** for their long-term goals.
- In terms of risk profiling, scheme is suitable for investors with a moderately high risk appetite.
- Investors who seek to benefit from market volatility may consider this scheme in their portfolio, since the scheme is structured with intent to benefit out of volatility.
